DETAILED ACTION

1. This action is the first on the merit of the instant application.
2. Claims 1-12 are pending in this action.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "a first uplink packet processor", "a second uplink packet processor", "a first downlink packet processor" and "a second downlink packet processor" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 2617

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 1 is objected to because of the following informalities: on line 13, the phrase, "established wireless LAN base stations" should be modified into --- established with said wireless LAN base stations. Appropriate correction is required.

Claim 12 is objected to because of the following informalities: "terminals" on line 8 should be --- terminal. There is not antecedent basis for "terminals". Appropriate correction is required.

Claim 1 is objected to because of the following informalities: "a second uplink packet processor" (on line 15) should be changed into -- an uplink packet processor, since there is no a first uplink packet processor provided for the diversity device. This is so because "a second" requires the presence of "a first". Appropriate correction is required.

Claim 1 is objected to because of the following informalities: "a second downlink packet processor," (on line 25, requires the presence of a first downlink packet processor. Appropriate correction is required.

Claims 1-12 are objected to because of the following informalities: the features in these claims are separated by commas (,) as oppose to by semi-colons (;) as required. Appropriate correction is required.

Claim 11 is objected to because of the following informalities: "a second uplink packet processor" (on line 25) and "a second downlink packet processor" (on line 29), suggests the presence of a first packet processor. Appropriate correction is required.

Claim 11 is objected to because of the following informalities: on line 19, "established wireless" should be --- established with wireless. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Considering claim 2 as an instance, "the first uplink packet processor", "the second uplink packet processor", "the first downlink packet processor", and the "the second downlink packet processor" are not clear whether they are reefing to the "diversity device" or (the wireless LAN terminal". The usage of such enumeration/designation, should be clearly associated with their corresponding embodiment/s. Similar problems exist in claims 3-10 and need to be addressed.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In this case, the diversity device (on line 20) has been made to transmit uplink packet to itself, which is an indefinite recitation. Examiner believes the diversity device (on line 20) has been mistaken for the wireless LAN terminal, since it performs the functions of the wireless terminal in the name of the diversity device.
